1. The first step in the process is to identify the problem. This is done by gathering information about the situation and the people involved. The next step is to analyze the problem and determine the causes. This is done by looking at the data and identifying patterns. The third step is to develop a plan of action. This is done by deciding on the steps that need to be taken to solve the problem. The fourth step is to implement the plan. This is done by putting the plan into action. The fifth step is to evaluate the results. This is done by looking at the data and seeing if the problem has been solved. If not, the process starts over.
